

JAWERIYA MUSKAN

GRAPHIC DESIGNER|FRONT-END DEVELOPER

Tikodi | mp773905@gmail.com | <https://www.linkedin.com/in/jaweriya-muskan>

SUMMARY

As a beginner graphic designer and front-end developer, I'm really focused on using creativity and technology together. The goal is to build user experiences that are engaging and make a real impact. I'm still learning the ropes, but I'm excited about the potential to create digital solutions that are both functional and visually appealing. It's all about finding that sweet spot where design and code come together to solve problems and make things better for users.

PROJECT

- Fullstack Development, CodeFirst Academy uner Codingera Software Pvt Ltd, Completed 2024

Project Title: Restaurant Website Development

Project Description: Designed and developed a modern, responsive website for a local restaurant to enhance its online presence and improve customer engagement. The website included features such as an interactive menu, order, location map, contact form, and integration with social media platforms. The goal was to create a visually appealing and user-friendly experience that reflected the brand and helped increase footfall and online reservations.

My Role:

Lead Front-End Developer

Collaborated with the client to understand their brand, menu, and service offerings.
